## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Drawings*

2. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2 and 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by DeAndrea et al. (U.S. Patent 5,515,468). DeAndrea et al. discloses an electro-optical module configuration comprising an electro-optical module including: a module body 15 having a top side; an optical connector interface 73 disposed at said top side; a surface mountable electro-optical converter 30 disposed in said module body; a fiber optic waveguide segment 203 having an end region; and a connector 80 accommodating said end region of said fiber optic waveguide segment, said connector being connectable to said optical connector interface for optically connecting said end region. The connector additionally comprises catch elements for connecting said connector to said module body (column 10, lines 15-34). It is noted that the fiber optic waveguide is oriented essentially horizontally in a mounted state. The interface additionally

includes a beam deflector 60. The electro-optical module is in combination with a printed circuit board 17 having a surface (inherent), wherein the fiber is oriented essentially parallel to the surface of the printed circuit board.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over DeAndrea et al. DeAndrea et al. does not specifically disclose height of the connector and the region of the fiber optic waveguide segment projecting therefrom to be greater than 3mm above the bottom side of the electro-optical module. However, when alternatively considering end wall 51 as the top side and end wall 52 as the bottom side, the optical connector interface still being disposed at said top side of the module body, it would have been obvious to one of ordinary skill in the art that the height of the projecting fiber segment and the connector would extend at a height of more than 3mm above said bottom side of the module, since that dimension for such modules is typically greater than 3mm.

***Conclusion***

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out

Art Unit: 2874

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
